

# Example of Research Paper outline

## ***I. What is Alzheimer's disease?***

- a. What is the definition?
- b. What are the symptoms?
- c. Who does it affect? (Insert statistics, past and present)

## ***II. How has Alzheimer's been studied and treated in the past?***

- a. Each of your letters could represent a time period, a researcher, or a treatment approach... and I suggest you order them chronologically. I don't know the specifics, but entries could look something like these:
  - b. What were approaches prior to 1900?
  - c. What did we learn from Dr. Smith's research?
  - d. How did Alzheimer's institutions develop?
  - e. How successful was (name) medication used in the 1960's? etc.

## ***III. What new options are developing for Alzheimer's patients?***

- a. B12 shots
  1. What is the potential?
  2. What are criticisms?
- b. Insert another new theory or approach here
  1. What is the potential?
  2. What are criticisms?
- c. Etc.

## ***IV. Conclusion***
